

## Optional Equipment

- Colored Sails
- Boat Cover
- Rear mast carrier
- Tiller extension
- Genoa (not class legal)
- Boom vang
- Outboard mount kit
- Whisker pole
- Hiking strap kit
- Colored hull
- Striped graphics

## Specifications

L.O.A.	13'-8"	4.16m
L.W.L.	12'	3.65m
Beam	6'-2"	1.88m
Draft (board up)	5"	12.7cm
Draft (board down)	3'-2"	96.52cm
Hull Weight	365 lbs.	165.9kgs
Sail Area	107 sq. ft.	32.6 sqm
Main Sail Area	70 sq. ft.	21.3 sqm
Jib Area	37 sq. ft.	11.3 sqm
Crew Capacity	4 adults	
Mast Height	18'-7"	5.66m

**NOTICE!** Aluminum masts conduct electricity. Observe caution when launching or sailing near power lines.

## Key Features

- Hand-laminated construction
- Positive foam flotation
- Dacron sails
- Stainless steel rigging
- Self-bailing cockpit
- Dacron yacht-braid sheets
- Anodized aluminum spars
- Adjustable swivel jam cleat
- Stainless steel sliding jib tracks
- Fiberglass kick-up rudder
- Hinged mast step
- Comptip™ mast
- Storage compartments
- Solid teak splashrails
- Rub rail

# Holder 14 Mk II

Welcome to the new-generation family daysailer, the Holder 14 Mark II by Hobie Cat, the most stable one-design performance monohull under 16 feet L.O.A. A quick look will explain why Hobie Cat is so proud of this exciting boat.

## Quality Construction

Hobie Cat is the innovator in fiberglass construction. The Holder 14 Mark II shows why. It features hand-laid fiberglass vacuum formed over a structural foam core for a very strong, stiff, but lightweight boat that planes easily.

Longitudinal fiberglass hull I-beams create even more strength. The hardened chine increases stability so the boat is forgiving without being slow.

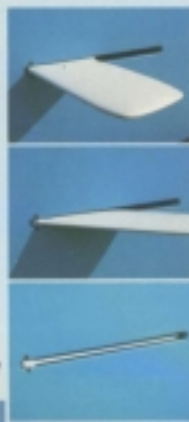

## Centerboard and Rudder

Our research and design team created a foiled, spring-action centerboard to increase both performance and convenience. This new board is easy to use because it retracts into its own well inside the boat's hull. If the board should hit an obstruction, it simply retracts so no major damage is done to the boat or the board.

The fiberglass rudder has been specially shaped for greater efficiency and performance. The rudder assembly is spring loaded for convenience and safety. One quick motion pops the rudder up or returns it to its "down" position. Like the centerboard, the rudder will raise itself should it hit an obstruction, or if you forget to raise it before beaching.

Fully retractable centerboard

Fiberglass "Kick-up" Rudder

## Warranty

Hobie Cat offers one of the strongest limited warranties in the industry. During the first year of ownership Hobie Cat will replace or repair any defective part or parts free of charge. The boat, hull and deck have a full five-year prorated warranty that can even be transferred to subsequent owners, a big boost to the resale value of your boat. Be sure to see the warranty for complete terms.

Optional roller furling system makes handling of jib sail even easier.

## Designed for Comfort

The Holder 14 Mark II is designed with the family in mind. It sails four adults easily and the ample, eight-foot cockpit space can stow gear and lunch for everybody. The cockpit is totally self-bailing. The boat's wide, flat hull shape is shallow and slightly rounded to increase planing ability.

The hardware is the best. The tracts and shrouds are heavy duty stainless steel; the blocks are Harken. The jib sail is large for more power. The optional roller furling system makes for easy storage and a quick reduction in jib sail area when needed. The tough Dacron sails are hand sewn in Hobie Cat's own sail loft. The mast is a light, high strength aluminum alloy topped with the exclusive Comptip™ mast tip, an essentially non-conductive composite that improves sail control in higher winds and helps protect sailors against the danger of overhead electrical power lines. (Sailors should always avoid contact of the mast with an electrical powerline, even with the Comptip™). Teak splash rails, and an extruded aluminum rub rail with plastic inserts to protect against dockside damage, are built right into the Holder 14 Mark II. This is a boat you'll be proud to own.

## Built-in Safety

In addition to the Comptip™ mast, the Holder 14 Mark II has many other safety features. Positive foam flotation sufficient to float five adults, the boat, gear and a small motor, makes the Holder 14 virtually unsinkable. The flotation, the raised foredeck and the boat's light weight make it easy to right in the event of a capsize. Coated wires help prevent scratches and cuts, and protect the sails. Anti-slip non-skid is molded right into the deck for effective, not abrasive, slip protection. And, most importantly, the hard chine of the Holder 14 assures inherent stability that allows for occasional mistakes. It's got a friendly temperament.

## Class Racing

When you buy the Holder 14 Mark II, you'll buy more than just a boat. Membership in the Holder Class Association is automatic for all owners. As a member, you can count on exciting class racing in well organized fleets. You'll meet new friends and travel to regattas, outings, and fun sails.
